

Hoppers Challenge: Coding for Sustainability

A sustainable world is one in which our environmental systems and societies flourish, natural resources are able to replenish themselves, and people are able to live healthy and secure lives. The growing complexity and scale of scientific computing workflows and AI training pipelines place huge demands on energy and other natural resources. Sustainability can be overlooked in favour of technological advancements, therefore it is of utmost importance for us to make the effort to consider how we can fit sustainability into our own projects.

The United Nation's Sustainable Development Goals:

<https://sustainability.ed.ac.uk/governance-publications-reports/reports/2021-22/sustainable-development-goals>

Scottish Government's data: <https://data.gov.scot/themes>

The Challenge

Consider the United Nation's Sustainable Development Goals.

Using the Scottish Government's data, figure out a way to apply these goals to solve a sustainability issue in Edinburgh.

Sustainable Development Goals

(You need to check the website for more information)

1. No poverty
2. Zero hunger
3. Good health and wellbeing
4. Quality education
5. Gender equality
6. Clean water and sanitation
7. Affordable and clean energy
8. Decent work and economic growth
9. Industry, innovation and infrastructure
10. Reduced inequalities
11. Sustainable cities and communities
12. Responsible consumption and production
13. Climate action
14. Life below water

15. Life on land
16. Peace, justice and strong institutions
17. Partnerships for the goals

Beginner Section

Stuck for ideas or not sure what to do? Have a look at these websites to get started.

HTML Tutorial (structure of a webpage):

How will we judge?

Marks will be given for the following:

- Teamwork (how much did everyone contribute)
- Originality
- Theme (How well does your project fit the theme of Sustainability?)
- Presentation Skills
- Project Quality

Good Luck!
