

GREENER BY POSTCODE:

sustainability where you live

At Postcode Lottery UK you don't play on your own. You play with the neighbours who share your postcode, and when you win, your street wins with you.

People care about their own patch, and keeping it green is something a street can do together in a way nobody manages alone. That's your challenge for today's AdaHack Day, Saturday 3 October.

THE CHALLENGE

Design and build something that helps neighbours keep their postcode area green. Show them what's happening where they live: the air, the green space, the local electricity. Then give them a reason to act on it together.

You can find all the causes that our players support at postcodelottery.co.uk/good-causes.

Stretch goal: make it work better the more of the street joins in.
